Film Thickness	50u
Structure	Single Ply
Adhesive Type	Acrylic

Notes

All data is based on film applied to 3mm clear float glass. Performance results are subject to variation within industry standards and are only intended for estimating purposes. There may be restrictions concerning the suitability of this product to certain glazing types. It is the users responsibility to ensure the product is suitable for the intended use. For more details please contact us.

Installation

Should be undertaken by professional window film installers. As per manufacturers instructions, film can only be applied in temperature of +5C. For best results, a clean and dust free area environment should be provided.

Drying

The curing period of the adhesive to the window often causes a slightly misty appearance. This is normal and will clear in a short period of time (usually around 7 - 20 days) depending on the thickness of the film. In very cold weather the curing process may take longer and the mistiness more pronounced. Nevertheless the film will clear to provide perfect clarity. Film can take up to 28 days to cure/dry.

Internal Application

Description

You have the nice new office with the beautiful glass partitions, now is the time to think about making these partitions unique to your business and meet building regulations. Cement your brand with your clients and add subtle levels of professionalism, high standards and business standards with glass partition graphics

From modern to traditional, frosted, colour or full colour graphics, Window Films 2000 can transform your office glass into a modern contemporary working environment that will inspire employees and impress clients.

We supply a range of "stock" effects but if you are looking for something more bespoke like the inclusion of a logo or individual names for office doors, we would be happy to bring our ideas to the table

For examples of all our window films or for more information of our services including manifestations and printed graphics, please visit our website
